## Statement

This manual content may be altered without permission, and Xiamen Hanin Electronic Technology Co., Ltd. reserves the rights to make changes without notice in technology, spare parts, hardware and software of the products. If more information is needed about the products, please contact Xiamen Hanin Electronic Technology Co., Ltd. Without any written permission from the company, any section of this manual is prohibited to be copied or transferred in any form.

#### Copyright

The copyright belongs to Xiamen Hanin Electronic Technology Co., Ltd.

Printed in China

Version 1.0

#### Warnings

This must be complied with in order to avoid any damage to the human body and to the equipment.

This is showing the important information and tips for the printer operating.

Due to continuous update of product, please take in kind of real machine, such as accessories, programs etc.

## **Important Safety Instructions**

#### 1. Safety Warning

Warnings: The print head will become very hot during printing; avoid contact with the print head after printing has finished.

Warnings: Do not touch the printer head and connector in case static damage the printer head.

#### 2. Instructions

Carefully read the installation and operating instructions provided with the printer before starting up your printer.

- 1) Place the printer on a flat and stable surface.
- 2) Leave enough space around printer for operation and maintenance.
- 3) Do not place the printer on or near a heat source.
- 4) Do not use the printer near water. Never spill liquid into the printer.
- 5) Do not expose the printer to high temperatures, direct sunlight or dust.
- 6) Protect the printer from shock, impact and vibration.
- 7) Be certain the power source is within the voltage rating and frequency listed for the printer.
- 8) Switch off the printer power supply when won't use it for a long time.
- 9) Do not place the power cord where it can be stepped on. If the power cord becomes damaged or frayed, replace it immediately.
- 10) To ensure the print quality and reliability, you are suggested to use the recommended paper or the same quality paper.
- 11) Please switch off the power supply when connect/disconnect all the ports or it will cause damage to the printer control circuit.
- 12) Never carry out maintenance or repair work yourself. Always contact a qualified service technician.
- 13) Keep this User Manual in a place which is easily accessible at all times.

#### **3.Other Precautions**

The copyright for this user manual and various other manuals is property of our company. Any copying or conversion into electronic form and saving of this material without the express written permission is strictly prohibited. Use of the information contained in this manual is not subject to any patent liability. This manual has been prepared with utmost care and attention to detail but may contain certain errors and/or omissions. Our company is not legally liable for any damages resulting from the use of the information in this manual. Our company and its affiliates are not legally liable (United States excluded) for any damages, loss, costs, and/or expenses that result from the breakdown, malfunction, and/or misuse of the product due to violation or neglect of the operation and maintenance information and instructions provided by our company, as well as from the unauthorized alteration, repair, and/or modification of the product by the user and/or third party. We are not legally liable for any damages and/or issues resulting from the use of options and/or parts that are not authentic or authorized products.

#### 4.WEEE (Waste Electrical and Electric Equipment)

This information only applies to customers in the European Union, according to Directive 2012/19/EU OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL OF 04 July 2012 on waste electrical and legal systems, and to customers in countries in Europe, Middle East and Africa(EMEA) where they have implemented equivalent regulations.

For other countries, please contact your local government to investigate the possibility of recycling your product.

Note: The product needs to be reliably earthing after being powered on.

FCC ID : 2AUTE-TP807P

## **1 OVERVIEW**

### **1.1 Introductions**

TP807 is a thermal receipt printer, featured by high print quality, high print speed, high stability, etc. It can be used in commercial POS system, food industry and occasions which need real-time field print receipts.

TP807 can connect with other equipment through serial/USB/Ethernet/Wi-Fi/Bluetooth interfaces. And the printer drivers are available for the WINDOWS XP/WINDOWS 7/WINDOWS 8/WINDOWS 10/Linux operating system.

#### **1.2 The Main Features**

- 1) Low noise
- 2) High print speed
- 3) Easy paper loading
- 4) Support page mode printing
- 5) Compatible with various width paper
- 6) Cash drawer interface
- 7) Communication interfaces optional

# HPRT

# **2 GETTING STARTED**

## 2.1 Packing List

After receiving your printer, please check for possible shipping damage:

- 1. Inspect the outside of both the box and the printer for possible damage.
- 2. Check whether you have received the following accessories together with the printer, if there are any items missing, please contact your local dealer.

Printer

**USB** Cable

Power Cord

Power Adapter

 $\bigcirc$ 

**Roll Paper** 

Serial Cable

Quick Start Guide

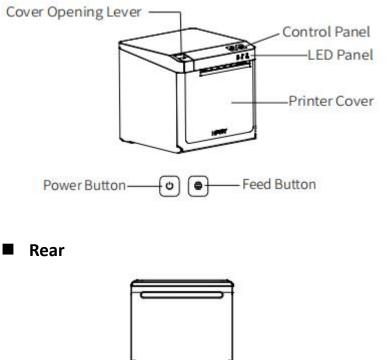

Notes:

The power adapter and power cord vary by country or region.
 Items in the package are dependent on the actual order.

### 2.2 Appearance and Components

Software	Driver	Win7/Win8/Win10/Linux CUPS/OPOS/JavaPOS		
Software	SDK	Android, iOS		
Agency App	provals	FCC, CE		

#### 3.2 Printing Media Specification

#### **3.2.1 Continuous Thermal Paper Specification**

Paper Type	: Specified Thermal Paper
Paper Width	$:58^{+0}_{-1}$ mm/ $80^{+0}_{-1}$ mm
Paper Outer Diameter	r : Max. 83 mm
Paper Thickness	:0.056 $\sim$ 0.13m

Paper Type	Manufacturer
FD210,PD150R,PD160R	OJI Paper CO.,LTD.

#### 3.2.2 Notices

Notes:

1) Please use the recommended thermal paper or same quality paper, otherwise it will influence the printing quality and decrease the thermal printer head life;

2) Don't stick the paper on the roll paper mandril;

3) If the thermal paper is polluted by chemical or oil, the thermal paper heat sensibility decreases, which will influence the printing quality;

4) Don't use finger nail or hard articles to touch the surface of thermal paper, otherwise it will cause color fading;

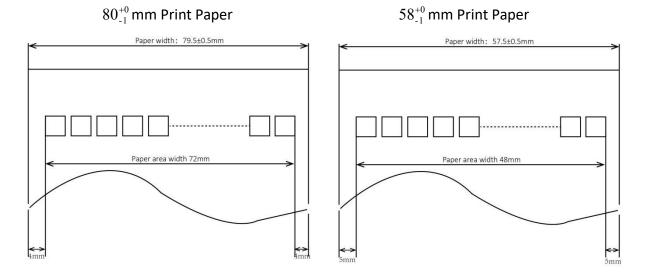

5) When the environment temperature is higher than 70°C, the thermal paper color will fade, so

pay attention to the influence of temperature, humidity and sunlight.

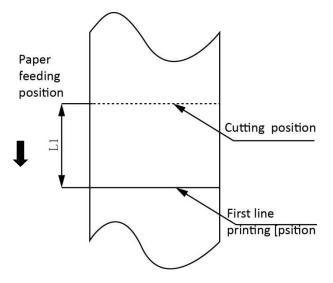

## 3.3 Printing and Cutting Position

### 3.3.1 Printing position

#### **3.3.2 Cutting Position**

Туре	Paper Cutting Position(L1)
TP807	11.6mm

# HPRT

# **4 INSTALLATION AND USAGE**

## 4.1 Media Loading

#### 4.1.1 Paper Confirmation

- 1) When using 80mm(width) roll paper, take down the paper guide of both sides.
- 2) When using 58mm(width) roll paper, insert the paper guide to each side.

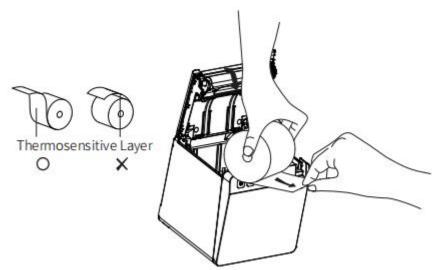

Note: Roll paper should be placed in the middle.

#### 4.1.2 Paper Installation (Forward Paper-out Direction)

1) Pull the cover opening lever to open the printer cover.

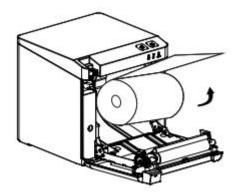

2) Load the roll paper in the correct direction as shown below.

3) Pull out some roll paper, and close the printer cover.

4) Tear the extra paper in the direction of printer.

Notes:

- 1) According to the paper size to adjust the paper guide;
- 2) Make sure the paper inside is at tight status, or it will cause paper jam or other trouble.

#### 4.2 LED Indication and Beeper

Function specification of indicated light and beeper.

Name	Status	Specification
POWER LED	ON	The printer works well
(Blue)	OFF	The printer does not work
ERROR LED	Flashing	The printer is in an error state
(Red)	OFF	The printer is in an normal state
PAPER LED	ON	The printer is in paper end state
(Orange)	OFF	The printer is in an normal state

Description	POWER LED	ERROR LED	PAPER LED	Beeper
Open the cover of printer	ON	ON	ON	"Веер, Веер—, Веер"
Full of paper	ON	OFF	OFF	Silent
No paper	ON	ON	ON	"Веер Веер Веер".
Cutter jam	ON	Flash	OFF	"Веер—, Веер—"

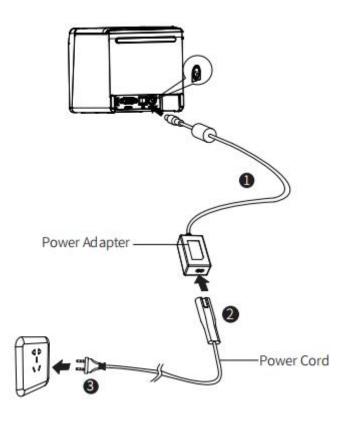

The printer uses a thermistor to detect the temperature of the print head. If the temperature of print head is more than 65°C, printer will send a warning. If the temperature of print head is more than 80°C, printer will stop working until the temperature is less than 60°C.

#### **4.3 Power Connection**

- 1) Connect power adapter to printer;
- 2) Connect power adapter to power cord;
- 3) Plug the other side of power cord into the socket outlet.

Pay attention about disconnecting or connecting the power adapter at right method, or it's easy to cause damage.

When pull out the adapter, please pinch the shell of power adapter and pull the switch up, when the switch is fully open, pull out the power adapter.

Don't pull the plug hard by squeezing at any other place of power adapter. Because it is difficult to pull it out and easy to damage the cable.

- 1) Please only use the power adapter recommended by supplier or equivalent products;
- 2) When disconnecting the power adapter plug, hold plug connector housing, and avoid pulling the cable directly;
- 3) Avoid dragging the power adapter cable, otherwise it will damage the cables, causing fire and shock;
- 4) Avoid putting power adapter around a heating device, otherwise the cable may melt, causing fire and shock;
- 5) If you do not use the printer in a long time, disconnect the power supply of printer power adapter.

### 4.4 Interface Cable Connection

- 1) Make sure the printer's power switch is turned off;
- 2) Put the interface cable into the matched interface and fixed with screws (or spring) on the plug;
- 3) Connect the other end of the interface cable to the host.

#### 4.5 Cash Drawer Connection

- 1) Make sure the printer's power switch is turned off;
- 2) Connect the cash drawer cable into the cash drawer interface on the rear side of the printer.

Cash drawer interface can only be connected to a voltage of 24V cash drawer device (can't connect to the phone line, etc.)

#### 4.6 Bluetooth/Wi-Fi Settings

#### **4.6.1 Bluetooth Settings**

Default name: BT Printer

Default password: 0000 or 1234

Please refer to the Bluetooth Connection Manual for details

QR code for Bluetooth Connection Manual

#### 4.6.2 Wi-Fi Settings

Printer factory default Wi-Fi mode is AP mode with IP address "192.168.1.1" and SSID "POS\_WIFI". After the PC or mobile phone is connected with printer successfully, users can set the parameters through utility tool.

Please refer to the Wi-Fi Operation Manual for details

QR code for Wi-Fi Operation Manual

#### 4.7 Print Test

#### 4.7.1 Print Self-Test

The self-test checks the printer's current settings, status and whether the printer has any problem.

- 1) Make sure the power is connected and paper is loaded properly.
- 2) Make sure the printer is off and top cover is closed properly.
- 3) Press the paper feed button and power button simultaneously to turn the printer on. The printer

is ready to receive data as soon as it completes the self-test.

#### 4.7.2 Printing of Windows Driver Program

- 1) Install the Windows Driver program. (Please refer to the Windows Driver Manual)
- 2) Please set the "Interface" as the type you use.
- 3) Use the Windows Driver Program to print out the "Print Test Page".

## **5 INTERFACES**

TP807 supports cash drawer interface and many other various communicate interfaces, such as Serial interface, USB interface, Ethernet interface, Wi-Fi and Bluetooth interfaces.

User end: Unetop DP-002 or other products of the same type.

## **6 TROUBLESHOOTING**

Your printer is very reliable, but occasionally problems may occur. This chapter provides information on some common problems you may encounter and how to solve them. If you encounter problems that you can not resolve, contact your dealer for assistance.

### 6.1 Printer Not Working

Problem Description	Probable Reason	Solution
	Printer has no power	Connect printer to the power supply
LED does not light, printer is not working	Printer is not on	Turn on the printer
working	Circuit board is broken	Contact with the dealer

#### 6.2 LED Indicator and Beeper

Problem Description	Probable Reason	Solution
Paper LED is always on	Paper near end	The roll paper is near end, the printer can work normally
Error LED is always on and beeper alarms	Printer cover is open	Close the printer cover
Paper LED and Error LED are always on and beeper alarms	Paper end	Reload the roll paper
	Thermal print head is overheated	Turn the printer off and resume when it cools
Error LED blinks and beeper alarms	Over-voltage	Print with specified voltage
	Low-voltage	Print with specified voltage

### **6.3 Troubles Occur During Printing**

Problem Description	Probable Reason	Solution
Coloured stripe in the paper	Paper near end	Reload the roll paper
Incorrect roll paper loading		Check if the roll paper is installed
	Unqualified roll paper	Use recommended thermal roll paper
Blurred printing or spot	Dirty thermal head or print roller	Clean the thermal head or print roller
	Low print density	Increase the print density level
Paper is not feeding normally	Paper jam	Open the printer cover, check the paper path and remove jammed paper
Vertical print words are	Dirty thermal head or print roller	Clean the thermal head or print roller
missing	Thermal head is damaged	Contact with your dealer for assistance

 $\Delta$  Note: Regarding the density of setting, please refer to "Utility Tool Manual".

## 6.4 Problems Emerge During the Paper Cutting

Problem Description	Probable Reason	Resolution	
	Cutter abrasion, insufficient cutting	Replace the cutter	
Cutter jam, the movable cutter	Worn gear and worn wheel abrasion	Replace the worn gear and worn wheel	
cannot go back	Motor is burnt	Replace the motor	
	Paper scraps	Clean the paper scraps on the transmission system	
Insufficient cutting	Cutter edge abrasion, paper is too thick	Replace the cutter	
	Thermal printer head is over-heated	Reduce the density of printing	
Paper jam	Driving too fast	Reduce the printer speed to the limit of thermal printer head	
	Wrong paper feeding position	Put the paper parallel with the paper mount and insert into the space between platen roller and the thermal printer head.	

Note: The density of setting, please refer to "Utility Tool Manual"

#### 6.5 Removing Jammed Paper

1555 Warning:Do not touch the thermal print head because it becomes very hot after printing.

If the printer cover can be opened, operate it according to the next steps.

- 1) Turn off the printer and pull the deflector rod to open the print cover.
- 2) Remove jammed paper, reload the paper roll, and close the printer cover.

# HPRT

## **7 PRINTER CLEANING AND MAINTENANCE**

Print quality might be degraded by dust, foreign substance, adhesive substance, or other polluted materials stuck on the printer head or inside the printer.

When printer is dirty, clean the print head as follows:

#### **※ CAUTION**

- Make sure to turn off the printer before cleaning.
- As the print head gets hot during printing, turn the printer off and wait approximately 2~3 minutes before starting cleaning.
- When cleaning the print head, take care not to touch the heated portion of the print head.
   Print head may be damaged by static electricity, etc.
- Avoid the print head being scratched and/or damaged in any way.

### 7.1 Cleaning Head

- 1) Open the Printer Cover and use the cleaning pen to clean the head in the direction from the center of the head to the edges.
- After cleaning the head, do not use the printer until the alcohol used for cleaning evaporates completely (1~2 min) and the printer is absolutely dry.

### 7.2 Cleaning Sensors, Roller and/or Paper Path

- 1) Open the printer cover and then remove the paper.
- 2) Use dry cloth or cotton swab to remove any dust or foreign substance .
- 3) Soak the cloth or cotton swab in medical-use alcohol and use it to remove adhesive foreign substances or other polluted materials.
- After cleaning the parts, do not use the printer until the alcohol evaporates completely (1~2 min) and the printer is completely dry.
- % Clean the parts whenever print quality or paper detection degraded.

## **8 DOWNLOAD SOFTWARES FROM HPRT WEBSITE**

Under URL <u>http://www.hprt.com/Downloads.html</u>, take the following steps to download software from HPRT website:

Partial Cut Test	Print Barcode
Print Text Test	2D Code Test
Print Available Code Pages	Printer Status

# 2) Full Cut Test

Click the "Full Cut Test" and the paper will be cut automatically. Cutting method is full-cutting. The paper would be falling down from the paper outlet after cutting.

# 3) Partial Cut Test

Click the cutter test and the paper will be cut automatically. Cutting method is partial cut (Partial cut: Not all cut off, leave a connection point between the two sheets of paper).

As shown in the figure:

I I I I I I I I I I I I I I I I I I I	
l	

# 4) Print Text Test

Click "Print Text Test", input the text you want to print. When you click "Print", the printer starts printing text content. Such as: Print Text Test.

Please enter the text you need to print:	(Length < 5000)
Printer Text Test	(Lengui < 5000)
	Select Language
	Language:

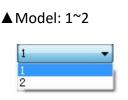

▲ Note: The language option in the lower right corner is checked according to the input text. (For example: The input is Simplified Chinese, the language is checked for Simplified Chinese, the printer prints the input text according to the setting options, and if you check other languages, the printer does not print the text)

#### 5) 2D Code

#### Click the QRCode mode.

Paper Near-End Sensor Sta	tus		
Enable	Disable		
		ŕ	
			Close(C)
		l	

# • AD Settings:

Detect Paper AD Value: click "Read" and you can see the default value and cannot be input.
 Set AD threshold value: You can input the value, and the ideal value is the AD value plus 300, and the default value is 2100.

- Long Beeping After cutting:
- 1 Disable: there is no sound after cutting
- 2 Use printer buzzer (The beeping time, times and interval time can be set for what you want, such as 1 milliseconds, 2 milliseconds or 3 milliseconds, etc.):

The following setting is set as an example:

When cutting one piece of paper each time, the printer will emit the "Beep" for one time, and the beeping time is two milliseconds and beeping interval is three milliseconds.

Printer Buzzer		
Beeping times:	1 (1-255)	
Beeping time:	2 (1-255) (100ms)	
Beeping interval:	3 (1-255) (100ms)	

Note: 100ms=0.1s, 1s=1000ms

• Buzzer Volume:

The "Very Low" is the minimum sound, and the "Loud" the maximum sound. You can select a volume level and click "Setting" to print (Default: "Standard" level).

# Reduction Print Setting

Select the item and click "Settings".

Reduction Of Excessive Top Margin:	Off	•
Reduction Of Excessive Bottom Margin:	Off	-
Reduction Vertical Spacing:	None	•
Reduction Line Feeds:	None	Ŧ
Reduction Height Of Barcode:	None	•
Setting	Close	

Choose the item and click "Setting".

① Reduction Of Excessive Top Margin:

When the printer is in the "off" state, the blank part at the top of the printed paper is larger than the blank part at the top of the paper printed in the "on" state.

2 Reduction Of Excessive Bottom Margin:

When the printer is in the "off" state, the blank part of the bottom of the printed paper is larger than the blank part of the bottom of the paper printed in the "on" state.

③ Reduction Vertical Spacing: 25%~75%

The bigger the reduction vertical spacing, the narrower the interval between two lines of characters.

(4) Reduction Line Feeds: 25%~75%

The higher the reduction line feeds, the narrower the interval between two lines of characters.

5 Reduction Height of Barcode: 25%~75%

The bigger the reduction height of barcode, the smaller the height of the barcode.

# • <u>DIP Setting</u>

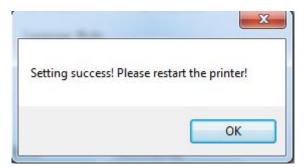

Click "Read" to get the printer parameters, click "Write" to send the modified parameters to the printer.

9200	- 8	bits 🔹 📕	No 👻	DTR/DSR -

Note: When DIP setting is set in soft, the DIP switch in the bottom of printer is disable.

After setting the DIP successfully, you need to restart the printer before using it.

# • Printer hardware setting

- Print Density: Light, Medium, Standard, Dark (default "standard" level) The print density value varies according to the paper material and it can be adjusted to suit your needs.
- 2) DIP Mode: 180/203DPI (default "203 DPI")The printer supports both of these resolutions.
- 3) Language Mode:

Chinese, Japanese, Korean mode (default) Multi-language mode

# • COM Setting

- 1) Baud Rate: 2400, 4800, 9600, 19200, 38400, 57600, 115200
- 2) Data Length: 7bits, 8bits
- 3) Parity Check: No, EVEN, ODD
- 4) ADDC: DTR/DSR, XON/XOFF

# Note: The value of the serial port parameter can be obtained according to the value of the Self-test page information:

E.g: Self-test page (Serial 115200, None, 8, 1, DTR/DSR)

Baud Rate: 115200

Parity Check: None

Data Length: 8bits

Stop Bits: 1

ADDC: DTR/DSR

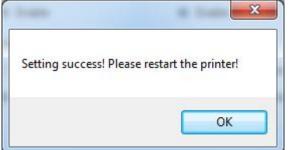

Note: When the DIP setting is set in memory switch mode, the DIP switch at the bottom of the printer need to be disabled.

#### • Modify the COM setting

COM Settings						
Baud Rate:	Data Length:		Parity Check:		Handshaking:	
57600	▼ 7bits	•	No	•	DTR/DSR	-

1) After setting the parameters as required, click "Write" and restart the printer.

2) After restarting the printer, open the main menu screen of the tool and click "Modify Printer".

Add Printer
Modify Printer
Delete Printer
Connection Test

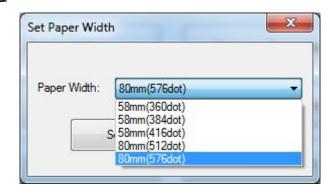

3) Select the port category "COM" and set the baud rate to the value "57600" as shown above, and parity "None". This port allows you to print after setup is complete.

Port type:	COM	-
System Port:	COM1	+
Baud rate:	57600	•
Parity:	None	•
Stop Bits:	1	•

Note: When the DIP setting is set in memory switch mode, the DIP switch at the bottom of the printer need to be disabled.

# • Paper Width Setting

- 1) 58mm (360dot)
- 2) 58mm (384dot)
- 3) 58mm (416dot)
- 4) 80mm (512dot)
- 5) 80mm (576dot)

Note: Select the paper width above according to the paper print width.

**Ethernet Setting** 

# Note: This setting is only available for models with Ethernet functionality.

This mode is divided into "Auto Assignment IP" and "Static IP Mode", select one of the modes to connect as needed.

Note: IP addresses can be obtained from the Self-test page.

Notes: When the printer is failed to connect with its master devices, please check if the settings are correct, and please check if the master devices and the printer are on the same network segment. When parameter setting error occurs, which leads to the failed connection, please reset the Wi-Fi parameter by the following way 1) or 2):

1) For TP807 (with built-in Wi-Fi module), shortly press the power button five times, so that the Wi-Fi parameter would be reset. The printer would restart automatically, so the reset is taken into effect.

2) For other models of POS printers (with external Wi-Fi module), shortly press the Function/Reset Button (at the interface board) for five times, and the Wi-Fi parameter would be reset. The printer would restart automatically, so the reset is taken into effect.

## **10 WINDOWS DRIVER**

### **10.1 Information**

This Windows Driver Installation Manual provides information on installation, detailed specifications, and usage of the printer's Windows Driver according to PC operating system (OS). We maintain ongoing efforts to enhance and upgrade the functions and quality of all our products. As follows, product specifications and/or user manual content may be changed without prior notice.

### **10.2 Operating System (OS) Environment**

The following operating systems are supported for usage.

- Microsoft Windows 10 (32 bit/64 bit)
- Microsoft Windows 8 (32 bit/64 bit)
- Microsoft Windows 7 SP1 (32 bit/64 bit)
- Microsoft Windows Vista SP2 (32 bit/64 bit)
- Microsoft Windows XP Professional SP3 (32 bit)
- Microsoft Windows Server 2012 (64 bit)
- Microsoft Windows Server 2008 R2

### **10.3 Windows Driver Preparation**

The Windows Driver is included in the enclosed CD. If the order doesn't include the CD, please follow the link <u>http://www.hprt.com/Downloads.html</u> and find the product name you want (for example TP807), then you can download Windows Driver and other items.

The Windows Driver installation file name is HPRT\_POS\_Printer\_Driver-v-X.X.X.X.exe

X.X.X.X indicates the version number, which is updated from time to time.

Eg. : HPRT\_POS\_Printer\_Driver\_v2.7.3.0.exe

### **10.4 Windows Driver Installation**

# Warning:

Under different operating system, the screen has slight difference. Please operate it according to

#### the tips. Take TP807 (Windows 7) as example.

- (1) Double click Windows Driver.
- (2) Choose "I accept the agreement" and click "Next".

🔂 Setup - HPRT POS Printer Driver v2.6.1.0	- • 💌
License Agreement Please read the following important information before continuing.	
Please read the following License Agreement. You must accept the terms of t agreement before continuing with the installation.	his
CAREFULLY READ THE FOLLOWING LEGAL AGREEMENT. THE SOFTWARE PROVIDED WITH THIS AGREEMENT (THE "SOFTWARE") IS LICENSED AND IT USE IS SUBJECT TO THE TERMS AND CONDITIONS BELOW. IF YOU DO NOT AGREE TO THE TERMS OF THIS AGREEMENT, PROMPTLY DESTROY THE SOFTWARE AND DOCUMENTATION.	'S
1. LICENSE GRANT  This software is only to be used with the equipment for which it has be made HPRT grants to you a non-exclusive, non-transferable right to use the SOFTWARE on the computer(s) that will print to the thermal printer(s). This	
I accept the agreement	
I do not accept the agreement	
Next >	Cancel

#### (3) Click "Next"

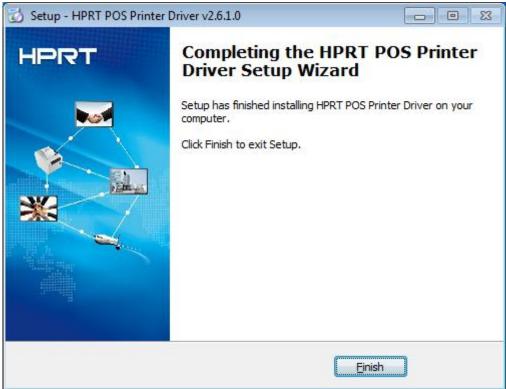

(4) Choose the matched type and port (USBxxx is for USB port, COMx is for serial port, LPTx is for parallel port). Choose the type and port of driver, such as "COM1" as port. Click "Next".

USB001 TPVM: SHRFAX: COM1:	Printer Model: TP807    Default Printer  Pre-install Driver Name: TP807
COM2: COM3: COM4: FILE: LPT1: LPT2: LPT3: XPSPort:	Baud Rate: 9600 ▼ Parity: NONE ▼
	Data Bits: 8  Stop Bits: 1 Flow Control: NONE

NOTE: If printer is already connected with computer by USB port, it only needs to click "Install", then it will be installed automatically. Otherwise, proceed to the next step.

(5) Click "Finish". POS printer driver is installed successfully.

(6) After installation, the icon will be found in "Start"  $\rightarrow$  "Devices and Printers".

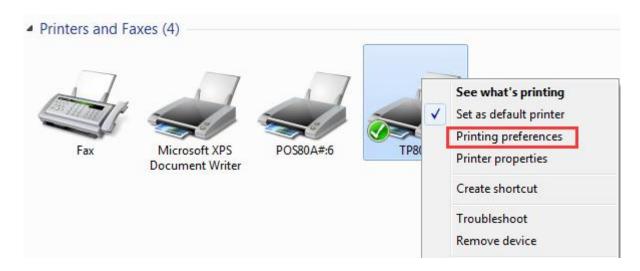

NOTE: If you already installed the driver (No matter what kind of port), when you connect the printer with computer, it will create a USB port automatically.

### **10.5 Detailed Windows Driver Setting**

### **10.5.1.** Printing Preferences

1. Click "Start"→"Devices and Printers". Right click "TP807" and choose "Printing preferences".

2. According to the different needs, choose "Paper"\"Offset"\"Rotate"\"Effect"\"Copies" in "Page".

4. Click "Halftone" to set the halftone.

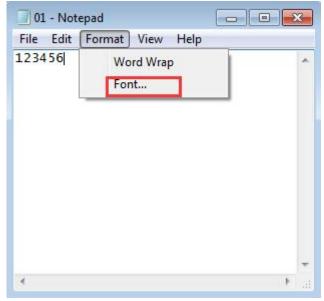

### 5. Set up the "Barcode"

Assuming the font type of the main document is "Italics", if you want to convert the data "123456" to the barcode printing, the steps are as follows:

• Sets the data "123456" font type to a different font from the main document. Such as: Arial.

Arial	
Arial	*
Calibri	
Cambria	
Cambria Math	
Candara	
Comic Sans MS	-

### • Open the Preference.

If the document is open, you can set it in the document: file-print-preferences.

### Paper Size:

70\*297mm 72\*420mm 72\*3276mm

# **APPENDIX**

### **FCC-DECLARATION OF CONFORMITY**

Product

HPRT TP807

We declare that the product conforms to the following specification: FCC Part 15, Subpart B Class B digital device.

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions:

- This device may not cause harmful interference;
- This device must accept any interference received, including interference that may cause undesired operation.
- The user is cautioned that any changes or modification not expressly approved in this manual could void the user's authority to operate the equipment. To ensure compliance, this printer must be used with shielded communication cables.
- Use only power supplies listed in this manual and /or recommended and approved in this manual.

#### FCC Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

### EC DECLARATION OF CONFORMITY

Manufacturer certifies that the following designated product

HPRT TP807

Type of product

**Direct Thermal Line Printing** 

It is in conformity with the standards

Test standard information

Under the Council Directive: (LVD) Directive 2014/35/EU relating to electrical equipment designed for use within Low Voltage Directive. EN 60950-1: 2006+A11:2009+A1:2010+A12:2011+A2:2013

Under the Council Directive: (EMC) Directive 2014/30/EU relating to Electro Magnetic Compatibility. EN 55032: 2015 EN 55024: 2010 EN 61000-3-2: 2014 EN 61000-3-3: 2013

We declare herewith that as a result of the manner in which the device designated Below was designed, the type of construction and the devices which, as a result have been brought on to the general market comply with the relevant fundamental regulations of the EC Rules for Safety. And we declare herewith the below mentioned model is conformity with Directive 2014/30/EU and 2014/35/EU. In the event of any alteration which has not been approved by us being made to any device as designated below, this statement shall thereby be made invalid.

The declaration is sole responsibility of the manufacturer
